DREAMS Multilevel Standardized Datasets Release Version 02

Overview	
Identification	AHRI.DREAMS.Multilevel.Standardized.v2
Version	V1.0.0
Abstract This study seek to arrest the HIV epidemic and its negative impact on young people in SSA communities by improving the uptake, retention and adherence of multi-level combination HIV prevention by AGYW and male partners. Specifically, the interventions supported by PEPFAR's Determined, Resilient, Empowered, AIDS free, Mentored, and Safe (DREAMS) program. Our central hypothesis is that effective uptake and retention of interventions by young people requires activation of interpersonal, family and community-level networks to support tailored and adaptive intervention delivery. The aims of the study are: • To quantify how multiple levels of social dynamics interact to predict uptake of multilevel interventions • To determine how individuals life-course transitions and exposure to DREAMS impacts on retention	
Kind of Data	Educational and nutritional status, general health, sexual behaviour and relationships, DREAMS awareness and uptake, MTV Shuga exposure, Mobility and other risky behaviours and HSV-2 test results
Unit of Analysis	Unit of analysis is participants

Scope & Coverage	
Keywords	DREAMS, multilevel, young people
Topics	HIV-1; Incidence; Phylogeny; Epidemics; Population Surveillance; Rural Population; HIV Infections; Africa
Time Period(s)	2018-2019
Countries	South Africa
Geographic Coverage South Africa	
Universe Effectiveness of this multi-level approach to HIV prevention will depend on the reach, uptake and retention of each component by AGYW and their male partners. Our analytic sample will be all male partners (men aged 15-29), residing in the AHRI surveillance area. There are 14,600 age-eligible men; we expect 58% to be resident and participate in the annual surveillance.	

Producers & Sponsors	
Primary Investigator(s)	Dr Maryam, Shahmanesh, Africa Health Research Institute
Other Producer(s)	Africa Health Research Institute (AHRI)
Funding Agency/ies	South African Medical Research Council (SAMRC) , Genotyping funding source
Other Acknowledgment(s)	Jaco Dreyer , Data management, cleaning and analysis , Africa Health Research Institute Nondumiso Mthiyane , Data management, cleaning and analysis , Africa Health Research Institute Wilkinson Eduan , Cleaned, aligned and help analyse the sequence data , KwaZulu-Natal Research Innovation Sequencing Platform

Sampling

Sampling Procedure

Participants were randomly selected from a southern part of AHRI surveillance area, stratified by age, sex and week-block. A target sample size was 2500 males aged 13-35 and 500 females aged 24-29 years.

Data Collection

Data Collection Dates	start 2018-09-03 end 2019-06-11

Data Processing & Appraisal

Data Editing

HSV-2 specimens were processed at AHRI Durban-based laboratory

Accessibility

Access Conditions

The representative of the Receiving Organization agrees to comply with the following conditions:

1. Access to the restricted data will be limited to the Lead Researcher and other members of the research team listed in this request.
2. Copies of the restricted data or any data created on the basis of the original data will not be copied or made available to anyone other than those mentioned in this Data Access Agreement, unless formally authorized by the Data Archive.
3. The data will only be processed for the stated statistical and research purpose. They will be used for solely for reporting of aggregated information, and not for investigation of specific individuals or organizations. Data will not in any way be used for any administrative, proprietary or law enforcement purposes.
4. The Lead Researcher must state if it is their intention to match the restricted microdata with any other micro-dataset. If any matching is to take place, details must be provided of the datasets to be matched and of the reasons for the matching. Any datasets created as a result of matching will be considered to be restricted and must comply with the terms of this Data Access Agreement.
5. The Lead Researcher undertakes that no attempt will be made to identify any individual person, family, business, enterprise or organization. If such a unique disclosure is made inadvertently, no use will be made of the identity of any person or establishment discovered and full details will be reported to the Data Archive. The identification will not be revealed to any other person not included in the Data Access Agreement.
6. The Lead Researcher will implement security measures to prevent unauthorized access to licensed microdata acquired from the Data Archive. The microdata must be destroyed upon the completion of this research, unless the Data Archive obtains satisfactory guarantee that the data can be secured and provides written authorization to the Receiving Organization to retain them. Destruction of the microdata will be confirmed in writing by the Lead Researcher to the Data Archive.
7. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Data Archive will cite the source of data in accordance with the citation requirement provided with the dataset.
8. An electronic copy of all reports and publications based on the requested data will be sent to the Data Archive.
9. The original collector of the data, the Data Archive, and the relevant funding agencies bear no responsibility for use of the data or for interpretations or inferences based upon such uses.
10. This agreement will come into force on the date that approval is given for access to the restricted dataset and remain in force until the completion date of the project or an earlier date if the project is completed ahead of time.
11. If there are any changes to the project specification, security arrangements, personnel or organization detailed in this application form, it is the responsibility of the Lead Researcher to seek the agreement of the Data Archive to these changes. Where there is a change to the employer organization of the Lead Researcher this will involve a new application being made and termination of the original project.
12. Breaches of the agreement will be taken seriously and the Data Archive will take action against those responsible for the lapse if willful or accidental. Failure to comply with the directions of the Data Archive will be deemed to be a major breach of the agreement and may involve recourse to legal proceedings. The Data Archive will maintain and share with partner data

archives a register of those individuals and organizations which are responsible for breaching the terms of the Data Access Agreement and will impose sanctions on release of future data to these parties.
