## AMETHIST:Adapted Microplanning to Eliminate Transmissible HIV in Sex Transactions:Engagement in services

Overview	
<b>Identification</b>	AHRI.AMETHIST.Recruitment.2022.v1
<b>Version</b>	V1.0.0
<p><b>Abstract</b></p> <p>AMETHIST: As part of the AMETHIST consortium which in Zimbabwe is conducting a randomised controlled trial of the effectiveness of adapted microplanning and self-help groups on transmissible HIV (AMETHIST), we aim to adapt and transfer their model to the very different setting of South Africa and where there is no current sex worker programme. Study aim: Building on the work conducted in Zimbabwe, we will investigate how readily AMETHIST can be translated to our rural KwaZulu-Natal, South African settings with less established clinical services for FSWs and to understand the predicted impact on the HIV epidemics and cost-effectiveness. Due to no active sex worker programme, we first had to identify female sex workers through mapping exercises. This was to collect and synthesise data on the geographical spread and social organisation of sex work with an aim to subsequently conduct a respondent-driven sampling (RDS) bio-behavioural survey.</p> <p>Specific objective for the AMETHIST SA RDS survey: Specific aims</p> <ol style="list-style-type: none"> <li>1. The prevalence and pattern of sex-work in these settings, including defining who is a sex worker, how they are defined/define themselves, patterns of sex work and types of sexual partnerships.</li> <li>2. To understand the sexual risk (defined as number of partners with condom-less sex) across and along the sex work life-course, including during transitions into and out of sex work</li> <li>3. Assess the unmet health needs of the FSWs</li> <li>4. Determine how (and the cost) to deliver AMETHIST intervention in rural KwaZulu-Natal, South Africa</li> </ol>	
<b>Kind of Data</b>	Survey data, census/enumeration data, aggregate data, clinical data, event/transaction data, program source code, machine-readable text, administrative records data, experimental data, psychological test, textual data, coded textual, coded documents, time budget diaries, observations data/ratings, process-produced data, etc. No description just a single phrase, e.g., Genetic sequences
<b>Unit of Analysis</b>	For PANGEA is each record a sequence from a specimen, or are there multiple records for a single specimen or study participant

Scope & Coverage	
<b>Keywords</b>	Female sex workers, HIV prevention, sexual reproductive health, RDS, STI testing, hard-to-reach population
<b>Topics</b>	Female sex workers, HIV prevention, sexual reproductive health, RDS, STI testing, hard-to-reach population
<b>Time Period(s)</b>	2021-2022
<b>Countries</b>	South Africa
<p><b>Geographic Coverage</b> Demographic surveillance area of the Africa Health Research Institute; KwaZulu-Natal, uMkhanyakude district.</p>	
<p><b>Universe</b> We conducted rapid participatory mapping in Phase 1 of the study - to understand the context of sex work, i.e. where, when and how sex work takes place. We then moved to Phase 2 to implement a respondent driven sampling (RDS) study consisting of 200 female sex workers (FSW) aged 18 and older living and working in the AHRI surveillance area - to understand demographic-behavioural characteristics, HIV prevalence among FSW and risk factors of HIV infection in this population.</p>	

Over a period of 7 months after mapping and identifying seeds, we collected demographic, behavioural and clinical data on FSWs with an interviewer-administered REDCAP survey. We also offered point of care HIV and syphilis testing, collect dried-blood spots (DBS) for HIV testing and viral load and vaginal self-taken swabs or urine for Chlamydia trachomatis CT/ Neisseria gonorrhoeae NG/trichomonas vaginalis TV/ testing). Referral for treatment, ART for those who are HIV positive and PrEP for those who are HIV negative, will be provided through referral to existing adolescent and youth-friendly clinical research study services (Isisekelo sempilo clinics).

<b>Producers &amp; Sponsors</b>	
<b>Primary Investigator(s)</b>	Professor Maryam Shahmanesh, Africa Health Research Institute (AHRI)
<b>Other Producer(s)</b>	Africa Health Research Institute (AHRI)
<b>Funding Agency/ies</b>	Wellcome Trust Collaborative Award (Wellcome Trust ) , Funder
<b>Other Acknowledgment(s)</b>	Jaco Dreyer , Data management, cleaning, and analysis , Africa Health Research Institute (AHRI)

<b>Sampling Procedure</b>

<b>Data Collection</b>	
<b>Data Collection Dates</b>	start 2021-11-25 end 2022-06-23

<b>Accessibility</b>
<p><b><u>Access Conditions</u></b></p> <p>The representative of the Receiving Organization agrees to comply with the following conditions:</p> <ol style="list-style-type: none"> <li>1. Access to the restricted data will be limited to the Lead Researcher and other members of the research team listed in this request.</li> <li>2. Copies of the restricted data or any data created on the basis of the original data will not be copied or made available to anyone other than those mentioned in this Data Access Agreement, unless formally authorized by the Data Archive.</li> <li>3. The data will only be processed for the stated statistical and research purpose. They will be used for solely for reporting of aggregated information, and not for investigation of specific individuals or organizations. Data will not in any way be used for any administrative, proprietary or law enforcement purposes.</li> <li>4. The Lead Researcher must state if it is their intention to match the restricted microdata with any other micro-dataset. If any matching is to take place, details must be provided of the datasets to be matched and of the reasons for the matching. Any datasets created as a result of matching will be considered to be restricted and must comply with the terms of this Data Access Agreement.</li> <li>5. The Lead Researcher undertakes that no attempt will be made to identify any individual person, family, business, enterprise or organization. If such a unique disclosure is made inadvertently, no use will be made of the identity of any person or establishment discovered and full details will be reported to the Data Archive. The identification will not be revealed to any other person not included in the Data Access Agreement.</li> <li>6. The Lead Researcher will implement security measures to prevent unauthorized access to licensed microdata acquired from the Data Archive. The microdata must be destroyed upon the completion of this research, unless the Data Archive obtains satisfactory guarantee that the data can be secured and provides written authorization to the Receiving Organization to retain them. Destruction of the microdata will be confirmed in writing by the Lead Researcher to the Data Archive.</li> <li>7. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Data Archive will cite the source of data in accordance with the citation requirement provided with the dataset.</li> </ol>

8. An electronic copy of all reports and publications based on the requested data will be sent to the Data Archive.
9. The original collector of the data, the Data Archive, and the relevant funding agencies bear no responsibility for use of the data or for interpretations or inferences based upon such uses.
10. This agreement will come into force on the date that approval is given for access to the restricted dataset and remain in force until the completion date of the project or an earlier date if the project is completed ahead of time.
11. If there are any changes to the project specification, security arrangements, personnel or organization detailed in this application form, it is the responsibility of the Lead Researcher to seek the agreement of the Data Archive to these changes. Where there is a change to the employer organization of the Lead Researcher this will involve a new application being made and termination of the original project.
12. Breaches of the agreement will be taken seriously and the Data Archive will take action against those responsible for the lapse if willful or accidental. Failure to comply with the directions of the Data Archive will be deemed to be a major breach of the agreement and may involve recourse to legal proceedings. The Data Archive will maintain and share with partner data archives a register of those individuals and organizations which are responsible for breaching the terms of the Data Access Agreement and will impose sanctions on release of future data to these parties.
