Peer Delivery of HIV Self-Screening to Support Linkage to HIV Prevention in Rural KwaZulu-Natal, South Africa: A Cluster Randomized Controlled Trial (CRCT). Release Version 5

Overview	
Identification	AHRI.STAR.2019.v5
Version	V5.0.0
Abstract	
<p>This study seeks to test the hypothesis that HIV-SS will allow peer delivered or peer led networks to effectively and efficiently link older adolescent girls and young women into HIV prevention and care services.</p> <p>Study Objectives:</p> <ol style="list-style-type: none"> 1. To increase the knowledge of HIV status among young women aged 18-24 years old and their male partners through distribution of HIV-SS through incentivized peer networks or direct distribution by peer navigators compared to peer navigators referring into HIV testing services. 2. To determine an increase in the rate of linkage among young women aged 18-24 to HIV prevention and treatment services facilitated by distribution of HIV-SS through incentivized peer networks or direct distribution by peer navigators compared to peer navigators referring into services. 3. To conduct a process evaluation of the acceptability, feasibility, and reach (out of school, recently migrant and living in remote areas) in linking 18-24-year-old women to HIV prevention and treatment services of HIV-SS distribution through incentivized peer networks, or direct distribution by peer navigators or peer navigators referring into services. 4. To measure the cost per 18-24-year-old linked to prevention and care through peer-led incentivized HIV-SS delivery system or direct distribution of HIV-SS by peer navigators, compared to peer navigator referring into services. 	
Kind of Data	Peer navigator outreach activities (HIV-SS and referral slips distribution) and clinic (attendance) data
Unit of Analysis	Data collected by peer-navigators will be summarised by cluster (peer-navigator pair).

Scope & Coverage	
Keywords	HIV-Self testing, peer outreach work, HIV prevention, PrEP, ART
Topics	HIV-1; Incidence; Phylogeny; Epidemics; Population Surveillance; Rural Population; HIV Infections; Africa
Time Period(s)	2019-2023
Countries	South Africa
Geographic Coverage	
Demographic surveillance area of the Africa Health Research Institute.	
Universe	
<p>The study population include 24 pairs of area (Ward/izigodi) based peer navigators working with over 2000 young people particularly young women aged 18-24 years. More than 2000 young people (males and females) will be reached during the trial in the 21 wards representing the study area.</p>	

Producers & Sponsors	
Primary Investigator(s)	Maryam, Shahmanesh, University College London Pillay, Deenan, Africa Health Research Institute
Other Producer(s)	Africa Health Research Institute (AHRI)

Funding Agency/ies	South African Medical Research Council (SAMRC) , Genotyping funding source
Other Acknowledgment(s)	Wilkinson, Eduan , Cleaned, aligned and help analyse the sequence data , KwaZulu-Natal Research Innovation Sequencing Platform

Sampling

Sampling Procedure

Since the study is a cluster randomised control trial with three arms where all areas in the southern Population Intervention Platform (PIP) were included, no formal sampling was done. We estimated that ~500 age eligible 18-24 years olds will be enrolled per peer navigator team catchment area, of whom we anticipate at least 200, 18-24-year-old females will be handed a coupon (so cluster size at least 200). We calculated the sample size calculation using the primary outcome, the rate of linkage after 3 months among women ages 18-24 years. Using our existing data on uptake of HIV testing in the DREAMS interventions as well as our data on uptake of testing and linkage to HIV care in the demographic surveillance rounds of, we estimate that 1 woman will link per 7 months of peer educators outreach work time in the standard of care. With 7 peer educator pairs (or clusters) per arm and a cluster coefficient of variation (k) of 0.25, we have 80% power to detect a 100% increase in rate from 1 woman to 2 women per 7 months of follow-up, and 90% power to detect a 150% increase from 1 woman to 2.5 women per 7 months of follow-up. We have chosen policy and clinically relevant increases in linkage to care. Assuming additional clustering of the outcome within peer educators and increasing the coefficient of variation (k) to 0.35, we have 80% power to detect a 150% increase in rate from 1 woman to 2.5 women per 7 months of follow-up. All sample size calculations assume two-tailed statistical tests with $\alpha=0.05$.

Data Collection

Data Collection Dates	start 2019-03-15 end 2023-01-10
------------------------------	------------------------------------

Data Processing & Appraisal

Data Editing

From Peer Navigator Monitoring Tool:

PeerNavIssueSTARPackages:

Contains all participant who agreed to participate in STAR and all associated variables capturing the distribution of packages between all 3 study arms.

Linking to other datasets:

The Unique QR Code of the Package will link with the Unique QR Code of the Referral slip of those participants linking to the clinic in the PrEP Clinic Participant Management System.

Linking to the ThethaNamiInformation dataset are done on the unique variable: PN_SurveyRecord.

Linking to the PeerNavInfo datasets on the unique variable: PeerNavCode

ThethaNamiInformation:

Contains information on all participants with whom the PNs interacted with, including the STAR participants, and the ThethaNami Questionnaire.

Linking to other datasets:

Linking to the STARPackageDistribution dataset are done on the unique variable: PN_SurveyRecord.

Linking to the PeerNavInfo datasets on the unique variable: PeerNavCode

PackageDistribution:

Contains the Package distribution information in a short format

Linking to other datasets:

Linking to the PeerNavInfo datasets on the unique variable: PeerNavCode

Linking to the STARPackageDistribution and ThethaNamiInformation datasets are done on the unique variable: PN_SurveyRecord.

Linking to PrEP Clinic Participant Management System is done on the Unique QR Code of the Package will link with the Unique QR Code of the Referral slip of those participants linking to the clinic.

From Peer Navigator Activity Log:

PeerNavActivityLog:

Summary of the amount to time PNs spent on the project on a daily basis. Contains start and stop times of each shift the PNs worked

Linking to other datasets:

Linking to the PeerNavInfo datasets on the unique variable: PeerNavCode

From PrEP Clinic Participant Management System:

PersonalDetails:

Personal details plus linking information to the STAR Package Distribution project are combined in this dataset. Contains one record per participant

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord

Linking to STARPackageDistribution and PackageDistribution on the variable: STARRefQRCode

ClinicVisits:

Contains one record per participant per visit. Some visits are linked to telephone calls and not clinic attendance. The participants attendance are indicated by variable: ClinicAttended. This dataset also includes the different reason for visiting the clinic on that day.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

Consents:

All consent forms and questions are combined into this dataset. Contains one record per participant for each question asked on each Informed Consent form they completed.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord

ClinScreenHealthPro:

Contains one record per participant, visit and Clinical Screening question asked. This included all questions from the following questionnaires:

Registration Questions

Clinical Screening - Alcohol Consumption

Health Promotion - Choice of contraception and condoms

Clinical Screening - Drug Use

Clinical Screening - HIV Testing history

Clinical Screening - HPV vaccine history

Health Promotion - Multiple health-related behaviors that will affect fertility and sexual pleasure

Clinical Screening - PMH / DH / Allergies

Health Promotion - Preconception advise and Contraception counselling

Clinical Screening - Population Association

Clinical Screening - Referral to DoH

Clinical Screening - Reproductive History / Pregnancies

Clinical Screening - Reproductive Tract Symptoms

Clinical Screening - Sexual history

Clinical Screening - Tobacco Consumption

Clinical Screening - TB Screening

Clinical Screening - Circumcision [Men]

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

ClinScreenHealthPro_Long:

Contains one record per participant and visit in a Long format. This included all questions from the following questionnaires:

Registration Questions

Clinical Screening - Alcohol Consumption

Health Promotion - Choice of contraception and condoms

Clinical Screening - Drug Use

Clinical Screening - HIV Testing history

Clinical Screening - HPV vaccine history

Health Promotion - Multiple health-related behaviors that will affect fertility and sexual pleasure

Clinical Screening - PMH / DH / Allergies

Health Promotion - Preconception advise and Contraception counselling

Clinical Screening - Population Association

Clinical Screening - Referral to DoH

Clinical Screening - Reproductive History / Pregnancies

Clinical Screening - Reproductive Tract Symptoms

Clinical Screening - Sexual history

Clinical Screening - Tobacco Consumption

Clinical Screening - TB Screening

Clinical Screening - Circumcision [Men]

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

VitalSigns:

Vital Signs measurements including, height and weight. Contains one record per participant and visit.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

PrEPeligibilityCheck:

Summary of all eligibility checks for participants wanting to start PrEP. Eligibility checks are repeated at each visit before dispensing medication. Contains one record per participant and visit.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

TestResults:

Contains one record per participant, visit and Test Result for point of care tests and Laboratory tests.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

Medications:

Contains one record per participant, visit and type of Medication dispensed. This dataset contains the following medication types:

STI Treatment

PrEP Treatment

ART Treatment

Contraceptive Treatment

Other Treatment

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

DrugAccountability:

Contains one record per participant and visit for PrEP Treatment.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

ClinicAttendPrEPOverview

Contains a summary of PrEP Eligibility Outcomes and PrEP Medication dispensing during the study. This dataset contains one record per participant.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

PhoneCalls:

Contains on record per participant, visit and telephone contact attempt. This dataset contains the following types of telephone calls:

Visit Reminder Phone Call

7 Day Follow Up Phone Call

Tracking Lost to Follow Up Phone Call

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

AdverseEvents:

Contains one record per participant and visit, determining if there were any Adverse Events to report or not.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

EndOfStudy:

Collected at the end of each visit to determine if the participant is continuing to the next visit or to provide the reasons for ending the study. Contains one record per participant and visit.

Linking to other datasets:

Linking to other Participant Management System dataset on variable: SurveyRecord and VisitId for those datasets with visits

Additional datasets:**PeerNavInfo:**

Contains the data on the PNs assigned Local Areas (Isigodis) and Study Arms

Linking:

Linking to the STARPackageDistribution, ThethaNamiInformation and PackageDistribution datasets on the unique variable: PeerNavCode

Accessibility**Access Conditions**

The representative of the Receiving Organization agrees to comply with the following conditions:

1. Access to the restricted data will be limited to the Lead Researcher and other members of the research team listed in this request.
2. Copies of the restricted data or any data created on the basis of the original data will not be copied or made available to anyone other than those mentioned in this Data Access Agreement, unless formally authorized by the Data Archive.
3. The data will only be processed for the stated statistical and research purpose. They will be used solely for reporting of aggregated information, and not for investigation of specific individuals or organizations. Data will not in any way be used for any administrative, proprietary or law enforcement purposes.
4. The Lead Researcher must state if it is their intention to match the restricted microdata with any other micro-dataset. If any matching is to take place, details must be provided of the datasets to be matched and of the reasons for the matching. Any datasets created as a result of matching will be considered to be restricted and must comply with the terms of this Data Access Agreement.
5. The Lead Researcher undertakes that no attempt will be made to identify any individual person, family, business, enterprise or organization. If such a unique disclosure is made inadvertently, no use will be made of the identity of any person

or establishment discovered and full details will be reported to the Data Archive. The identification will not be revealed to any other person not included in the Data Access Agreement.

6. The Lead Researcher will implement security measures to prevent unauthorized access to licensed microdata acquired from the Data Archive. The microdata must be destroyed upon the completion of this research, unless the Data Archive obtains satisfactory guarantee that the data can be secured and provides written authorization to the Receiving Organization to retain them. Destruction of the microdata will be confirmed in writing by the Lead Researcher to the Data Archive.

7. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Data Archive will cite the source of data in accordance with the citation requirement provided with the dataset.

8. An electronic copy of all reports and publications based on the requested data will be sent to the Data Archive.

9. The original collector of the data, the Data Archive, and the relevant funding agencies bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

10. This agreement will come into force on the date that approval is given for access to the restricted dataset and remain in force until the completion date of the project or an earlier date if the project is completed ahead of time.

11. If there are any changes to the project specification, security arrangements, personnel or organization detailed in this application form, it is the responsibility of the Lead Researcher to seek the agreement of the Data Archive to these changes. Where there is a change to the employer organization of the Lead Researcher this will involve a new application being made and termination of the original project.

12. Breaches of the agreement will be taken seriously and the Data Archive will take action against those responsible for the lapse if willful or accidental. Failure to comply with the directions of the Data Archive will be deemed to be a major breach of the agreement and may involve recourse to legal proceedings. The Data Archive will maintain and share with partner data archives a register of those individuals and organizations which are responsible for breaching the terms of the Data Access Agreement and will impose sanctions on release of future data to these parties.

Variables Description

Dataset contains 426 variable(s)

File : AHRI.STAR.AdverseEvents.2019.v5

SurveyRecord: Unique record identifier linked to PrEP Clinic REDCap Project

Information [Type= continuous] [Format=numeric] [Range= 7-575] [Missing=*]

Statistics [NW/ W] [Valid=449 /-] [Invalid=0 /-] [Mean=233.225 /-] [StdDev=150.852 /-]

VisitId: Clinic Visit Identifier

Information [Type= continuous] [Format=numeric] [Range= 1266-3829] [Missing=*]

Statistics [NW/ W] [Valid=449 /-] [Invalid=0 /-] [Mean=1289.726 /-] [StdDev=240.879 /-]

Instance: Instance

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=449 /-] [Invalid=0 /-]

AnyAEs: Did the participant reported any side effects or adverse events since the last v

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=449 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Yes	4	0.9%
2	No	445	99.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

SideEffect: Common side effects of PrEP - Code

Information [Type= continuous] [Format=numeric] [Range= 3-96] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-] [Mean=49.5 /-] [StdDev=53.694 /-]

SideEffectDesc: Common side effects of PrEP - Description

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=0 /-]

SideEffectOth: Details of other side effect or adverse event

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=2 /-] [Invalid=0 /-]

StartDate: Start date of event

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=4 /-]

Ongoing: Is the event ongoing?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-]

Value	Label	Cases	Percentage
1	Yes	1	25.0%
2	No	3	75.0%
Systemiss		445	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

StopDate: Stop date of event

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=3 /-]

File : AHRI.STAR.AdverseEvents.2019.v5

Severity: Severity of event - Code

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-]

SeverityDesc: Severity of event - Description

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=0 /-]

Relationship: Relationship to study - Code

Information [Type= discrete] [Format=numeric] [Range= 2-3] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-]

RelationshipDesc: Relationship to study - Description

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=0 /-]

ActionTaken: Action Taken Regarding Drug adverse event - Code

Information [Type= continuous] [Format=numeric] [Range= 1-96] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-] [Mean=25 /-] [StdDev=47.336 /-]

ActionTakenDesc: Action Taken Regarding Drug adverse event - Description

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=0 /-]

ActionTakenOth: Please specify details on other action taken

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=1 /-] [Invalid=0 /-]

Outcome: Outcome of event - Code

Information [Type= discrete] [Format=numeric] [Range= 1-1] [Missing=*]

Statistics [NW/ W] [Valid=3 /-] [Invalid=446 /-]

OutcomeDesc: Outcome of event - Description

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=3 /-] [Invalid=0 /-]

Expected: Is this an expected event for this study?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-]

Value	Label	Cases	Percentage
1	Yes	3	75.0%
2	No	1	25.0%
System		445	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Serious: Is this a Serious Adverse Event?

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=4 /-] [Invalid=445 /-]

File : AHRI.STAR.AdverseEvents.2019.v5

Serious: Is this a Serious Adverse Event?

Value	Label	Cases	Percentage
1	Yes	0	
2	No	4	100.0%
System		445	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.
