AHRI.Core Dataset:Vaccinations.Release 2023

Overview	
Identification	AHRI.RD01-15.Vaccinations.2023
Version	v1.0.0
Abstract	
<p>Vaccination details are collected on the CHL ("Child Health") form. The version of the form used using DS Rounds 1 - 16 (i.e. until mid-2007) is shown below. A cosmetically prettier, but otherwise identical form was used in Rounds 17 and 18 (i.e. Jul 2007 - Jun 2008). From July 2008 a heavily revised version of the form, also included below, has been used. It was updated for 2010 to record several new vaccinations. Until Round 18 the CHL form was an ad-hoc form (i.e. not pre-printed, and the trigger for a fieldworker to complete one was a prompt on the HMU form asking "Has [NAME] turned 1 since last visit?" From Round 19 a pre-printed CHL is included in the bundle for every resident child aged 1-4. In other words the CHL is now typically administered several times, not just once as before. The pre-printed CHL contains details of all vaccinations recorded in earlier Rounds so will only require addition of new vaccinations. In this way the quality of data should be greatly improved as data is collected much closer to the event - and also many fewer children should escape the net entirely. Most of the Vaccinations dates are held in the database only as "Variable precision dates" i.e. text strings which may be precise e.g. 20041223 or have, perhaps, an unknown day e.g. 200412UU. The dates offered in this dataset are „real? dates where the UU values have been randomly assigned. This is done each time the dataset is extracted, and so may vary from one analytical dataset copy to another.</p>	
Kind of Data	Vaccinations

Topics	Vaccinations
Time Period(s)	2000-2023
Countries	South Africa

Accessibility

Access Conditions

Access to the data requires accurate completion of the online data access application form accessible on the AHRI Data repository (<<https://data.ahri.org/>>). Data users are required to abide by the data use conditions stipulated on the application for access to the data. Failure to do so may result in their data access privileges being revoked by the Data Custodian. In order to recognise the effort and intellectual contributions of AHRI investigators in producing and curating the data, users of AHRI data must acknowledge the source of the data and abide by the terms and conditions under which the data is accessed and must cite the dataset in publication using the citation provided as part of this documentation. All analytical datasets published

on the AHRI Data Repository are assigned digital object identifier (DOIs) and the DOIs can be found on the Data Repository under Study Description tab - Access policy. AHRI data users are required to always cite the dataset using the relevant DOI.
