Overview

Identification	AHRI.CFC.Brazil.Dataset.2024
Version	v1.0.0

Abstract
In a quasi-experimental pre-post intervention evaluation design, Brazil collected caregiver data as a part of a larger global validation study on the effects of a mental health promotion intervention called Caring for the Caregiver. Caring for the caregiver is a frontline worker-delivered integrated mental health promotion intervention where FLWs are exposed to essential skills training and/or toolkit activities. The validation study aimed to determine whether this exposure improved caregiver self-efficacy and social support and reduced depression, anxiety, and parenting stress in six countries. Data on the caregiver's perception of the intervention was also collected.

Variables:

(Age, Marital status, Education, Employment, Asset score, Food security, Child gender, Stressors, Partner relationship)

(Pre and post scores on Depression (PHQ-9). Anxiety (GAD-7), Parenting stress (PSI-36), Self-efficacy (GSE), Social support (MPSS))

Kind of Data	Quasi-experimental pre-post data from self-report questionnaires and standardised psychological measures
Unit of Analysis	Each study participant had to complete multiple time points: a baseline, a visit 1 (collected at the same time) and a visit 2 assessment (collected 5 months after the implementation of CFC had started).

Scope & Coverage

Keywords	Mental health promotion, stress, caregivers, intervention, frontline worker
Topics	Mental health, Depression, Anxiety, Stress, Psychological
Time Period(s)	2021
Countries	South Africa

Geographic Coverage
Brazil

Universe
Caregivers of children aged 0-24 months who were participating in the support of child development through the PADIN programme in Brazil.

Producers & Sponsors

Sampling

Sampling Procedure
A purposive sample of caregivers were chosen based on the caregivers participating in the PADIN programme with children between the ages of 0-24 months and who were being visited by FLWs trained in CFC.
Target sample size: 200

Data Collection

Data Collection Dates	start 2021-07-17
	end 2021-12-18

Accessibility

Access Conditions
Access to the data requires accurate completion of the online data access application form accessible on the AHRI Data repository(<https://data.ahri.org/>). Data users are required to abide by the data use conditions stipulated on the application for access to the data. Failure to do so may result in their data access privileges being revoked by the Data Custodian. In order to recognise the effort and intellectual contributions of AHRI investigators in producing and curating the data, users of AHRI data must acknowledge the source of the data and abide by the terms and conditions under which the data is accessed and must cite the dataset in publication using the citation provided as part of this documentation. All analytical datasets published on the AHRI Data Repository are assigned digital object identifier (DOIs) and the DOIs can be found on the Data Repository under Study Description tab - Access policy. AHRI data users are required to always cite the dataset using the relevant DOI.
