Overview	
Identification	AHRI.Sesikhona.ActivitySpace.Survey
Version	v1.0.0
Abstract	
<p>The Sesikhona study is the first of its kind study using smartphone-based GPS technology to record ultra-high resolution mobility patterns of over 200 young adults aged 20-30 years in rural KwaZulu Natal. The study seeks to identify distinct movement typologies within this highly mobile, HIV hyper-endemic population and to quantify travel in and out of known high-risk locations, with the long-term goal of developing a location-intelligent smartphone intervention that delivers real-time, precision messaging to individuals at heightened risk of HIV acquisition, transmission or treatment interruption. Conducted in three phases between 2021 and 2025, the study used the Avicenna Research Platform to collect GPS and survey data. Between 2023 and 2025, consenting individuals self-completed surveys bi-daily and monthly based on their travel, mobility and activity space questions to validate the collected GPS location data, understand reasons for travel and planning thereof. 25978, 25237, 25236, 25235, 22768, 22766</p>	
Kind of Data	Survey data
Unit of Analysis	Young adults aged 20-30 years old

Scope & Coverage	
Keywords	Human mobility, HIV, GPS technology, digital technology, travel, mobility and activity space
Topics	GPS technology, smartphone-based GPS, human mobility, young adults, HIV, mobile health, digital technology, mental health
Time Period(s)	2024-2025
Countries	South Africa
Geographic Coverage	
Residents from uMkhanyakude in KwaZulu Natal but move anywhere in South Africa	
Universe	
A random sample of adults aged 20-30 years old who were residents in Southern PIPSA, participated in the 2019 HIV surveillance and consented to participate in Sesikhona study and opted in for the sexual behavior surveys

Accessibility

Access Conditions

Access to the data requires accurate completion of the online data access application form accessible on the AHRI Data repository(<<https://data.ahri.org/>>). Data users are required to abide by the data use conditions stipulated on the application for access to the data. Failure to do so may result in their data access privileges being revoked by the Data Custodian. In order to recognise the effort and intellectual contributions of AHRI investigators in producing and curating the data, users of AHRI data must acknowledge the source of the data and abide by the terms and conditions under which the data is accessed and must cite the dataset in publication using the citation provided as part of this documentation. All analytical datasets published on the AHRI Data Repository are assigned digital object identifier (DOIs) and the DOIs can be found on the Data Repository under Study Description tab - Access policy. AHRI data users are required to always cite the dataset using the relevant DOI.
