TITLE

Impact of the UNICEF “Caring for the Caregiver” intervention on mental health, social support, and parenting stress: a six-country pre-post evaluation

COUNTRY

| Name | Country code |
|--------------|--------------|
| Bhutan | BT |
| Brazil | BR |
| Serbia | RS |
| Sierra Leone | SL |
| Rwanda | RW |
| Zambia | ZM |

ABSTRACT

The UNICEF Caring for the Caregiver package is a counselling approach and behaviour change intervention that can be integrated into routine home-visiting. We aimed to evaluate caregiver outcomes and explore intervention experiences in six low-income and middle-income countries (Bhutan, Brazil, Serbia, Sierra Leone, Rwanda, and Zambia). Using a non-randomised pragmatic design, we recruited caregivers in using community-based sampling. Caregivers reported dose exposure and completed pre-post outcome measures of self-efficacy, social support, depression, anxiety and parenting stress. Using pooled data, two-way fixed effects regressions examined change and variations in outcomes, by dose. Perception data were collected from caregivers and frontline workers.

Study Aim: The research has three aims: (1) to assess change in outcomes linked to intervention targets; (2) to explore whether change in outcomes differed by reported dose exposure level; and (3) to explore frontline workers' and caregivers' perceptions of the intervention

KIND OF DATA

Pre-post intervention interviews

UNIT OF ANALYSIS

· Caring for the caregiver validation study participants

Coverage

GEOGRAPHIC COVERAGE

127 geographic areas (villages, districts) across the 6 countries

UNIVERSE

A non-randomised pragmatic study of the impact of the caring for the caregiver intervention integrated into routine frontline worker visits. We trained 198 frontline workers and recruited 822 pregnant and postnatal caregivers, receiving the intervention from 198 frontline workers in 127 unique areas across six countries.

Data Processing

DATA EDITING

The data collected and captured on REDCap was uploaded to a MySQL database server within AHRI's secure server cluster.

Access policy

ACCESS CONDITIONS

Access to the data requires accurate completion of the online data access application form accessible on the AHRI Data repository(<<https://data.ahri.org/>>). Data users are required to abide by the data use conditions stipulated on the application for access to the data. Failure to do so may result in their data access privileges being revoked by the Data Custodian. In order to recognise the effort and intellectual contributions of AHRI investigators in producing and curating the data, users of AHRI data must acknowledge the source of the data and abide by the terms and conditions under which the data is accessed and must cite the dataset in publication using the citation provided as part of this documentation. All analytical datasets published on the AHRI Data Repository are assigned digital object identifier (DOIs) and the DOIs can be found on the Data Repository under Study Description tab - Access policy. AHRI data users are required to always cite the dataset using the relevant DOI.
