DREAMS Impact Evaluation Project – Nested Cohort – Follow Up Round 01

Overview

Identification	AHRI.DREAMS.Nested.Cohort.Follow-Up
Version	V1.0.0

Abstract
The main aim of this study is to evaluate the impact and effectiveness of the scale up of the DREAMS HIV prevention package of biological, behavioural and social interventions in reducing HIV incidence in adolescent girls and young women residing in the uMkhanyakude district of KwaZulu-Natal. To achieve this aim, the changes in different outcomes will be assessed over time. The primary outcome will be HIV incidence and other key secondary outcomes will include knowledge of own HIV status, sexual debut, HSV-2, number of sexual partners, age-disparity with sexual partners, ever been pregnant, condom use, unmet need for contraception, transactional sex, education (remaining in school) and experiences of violence.

Kind of Data	Longitudinal survey data
Unit of Analysis	Individual

Scope & Coverage

Keywords	DREAMS nested cohort; sexual history; Adolescent Girls and Young Women (AGYW); GEMS scale; ; HIV testing;Partnership loop;Coverage
Topics	HIV prevention; Interventions; Adolescents; Young people; Sexual health; Population Surveillance; Rural Population; HIV Infections; Africa
Time Period(s)	2018
Countries	South Africa

Geographic Coverage
Demographic surveillance area of the Africa Health Research Institute; KwaZulu-Natal, uMkhanyakude district.

Universe
Closed cohorts of 800 AGYW will be followed prospectively at three time points over the two-year study period - baseline, 12 months and 24 months - at points closest aligned with periods before, during and after DREAMS implementation. In ACDIS cohorts of 400 girls aged 13-17 years and 400 young women aged 14-23 years will undergo informed consent, recruited undergo a baseline questionnaire and provide dry blood spots for HSV2 at the same time they provide a sample for the HIV testing in the surveillance and then reviewed annually for the next two years.

Producers & Sponsors

Primary Investigator(s)	Dr Maryam, Shahmanesh, Africa Health Research Institute
Other Producer(s)	Africa Health Research Institute (AHRI)
Funding Agency/ies	Bill & Melinda Gates Foundation (BMGF) (BMGF) , Impact Evaluation of PEPFAR funded DREAMS interventions
Other Acknowledgment(s)	Jaco Dreyer , Data management, cleaning and analysis , Africa Health Research Institute Nondumiso Mthiyane , Data management, cleaning and analysis , Africa Health Research Institute

Sampling

Sampling Procedure

Adolescent girls and young women aged 14-23 years who were residents in the demographic surveillance area of the Africa Health Research Institute. A total of 3013 participants were randomly selected to obtain a target sample size of 800 after 2 years of follow-up, allowing for 40% non-contact/loss-to-follow-up. Sampling was stratified by age group and area (week-blocks).

Data Collection

Data Collection Dates	start 2018-04-03 end 2018-07-13

Data Processing & Appraisal

Data Editing

All data will be managed using electronic data management tools. The data management system for these will be based on REDCap (research electronic data capture) developed at Vanderbilt University. The REDCap database resides within a single MySQL database server within a secure server cluster at the AHRI. Survey data are synchronised by the REDCap application from the mobile device to a central MySQL server. Access control is managed through Microsoft Active Directory with minimum password complexity and compulsory password change policies.

Accessibility

Access Conditions

The representative of the Receiving Organization agrees to comply with the following conditions:

1. Access to the restricted data will be limited to the Lead Researcher and other members of the research team listed in this request.
2. Copies of the restricted data or any data created on the basis of the original data will not be copied or made available to anyone other than those mentioned in this Data Access Agreement, unless formally authorized by the Data Archive.
3. The data will only be processed for the stated statistical and research purpose. They will be used for solely for reporting of aggregated information, and not for investigation of specific individuals or organizations. Data will not in any way be used for any administrative, proprietary or law enforcement purposes.
4. The Lead Researcher must state if it is their intention to match the restricted microdata with any other micro-dataset. If any matching is to take place, details must be provided of the datasets to be matched and of the reasons for the matching. Any datasets created as a result of matching will be considered to be restricted and must comply with the terms of this Data Access Agreement.
5. The Lead Researcher undertakes that no attempt will be made to identify any individual person, family, business, enterprise or organization. If such a unique disclosure is made inadvertently, no use will be made of the identity of any person or establishment discovered and full details will be reported to the Data Archive. The identification will not be revealed to any other person not included in the Data Access Agreement.
6. The Lead Researcher will implement security measures to prevent unauthorized access to licensed microdata acquired from the Data Archive. The microdata must be destroyed upon the completion of this research, unless the Data Archive obtains satisfactory guarantee that the data can be secured and provides written authorization to the Receiving Organization to retain them. Destruction of the microdata will be confirmed in writing by the Lead Researcher to the Data Archive.
7. Any books, articles, conference papers, theses, dissertations, reports, or other publications that employ data obtained from the Data Archive will cite the source of data in accordance with the citation requirement provided with the dataset.
8. An electronic copy of all reports and publications based on the requested data will be sent to the Data Archive.
9. The original collector of the data, the Data Archive, and the relevant funding agencies bear no responsibility for use of the data or for interpretations or inferences based upon such uses.
10. This agreement will come into force on the date that approval is given for access to the restricted dataset and remain in force until the completion date of the project or an earlier date if the project is completed ahead of time.
11. If there are any changes to the project specification, security arrangements, personnel or organization detailed in this application form, it is the responsibility of the Lead Researcher to seek the agreement of the Data Archive to these changes. Where there is a change to the employer organization of the Lead Researcher this will involve a new application being made and termination of the original project.

12. Breaches of the agreement will be taken seriously and the Data Archive will take action against those responsible for the lapse if willful or accidental. Failure to comply with the directions of the Data Archive will be deemed to be a major breach of the agreement and may involve recourse to legal proceedings. The Data Archive will maintain and share with partner data archives a register of those individuals and organizations which are responsible for breaching the terms of the Data Access Agreement and will impose sanctions on release of future data to these parties.
